	Examiner Faye Francis	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The Affidavit filed on 6/3/05 is hereby acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by LaFata et al. [US 2005/0148276 A1] herein after LaFata.

LaFata discloses in the embodiment of Fig 9, a fog filled bubble blower comprising: a housing 12 attached to a battery box 320, exhaust fan 240, fog fluid reservoir [chamber 234], fog chamber, heating element assembly 236, electric motor, nozzle, and bubble wand, and having switching circuits 35 to operate the electric motor and the heating element assembly, so that when fog fluid from the fog fluid reservoir reaches the heating element assembly, the fog fluid is vaporized in the fog chamber, and when the bubble wand is dipped into bubble solution, and the exhaust fan is activated, fog is sucked out of the fog chamber and forced through the nozzle and through the bubble wand [0113], forming a bubble which is filled with fog as recited in claim 1. Additionally, LaFata discloses that fresh air enters the fog chamber so that the heating element assembly is between the fresh air entering the fog chamber and the

exhaust fan [0121] as recited in claims 2 and 4, fresh air enters the fog chamber through a fresh air intake hose [pipe 230] that does not pass fresh air through the exhaust fan before the fresh air enters the fog chamber [Fig 9] as recited in claims 3 and 5.

Response to Arguments

4. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.
